

The Saturn Myth Critique

by Tess Clark

My goal is to find to have a better understanding of the origins and history of the Solar System.

If you were a fan and had seen all the Star Wars movies and you knew all the characters and the whole story line, then you went to a different part of the world where people were not familiar with the movie series.

In this unfamiliar place you saw a movie called 'Star Wars Enigma: based on the Star War's original Movie series'. You watched the movie and you realized that the 'new version' has taken out of the plot 90% of the characters, and omitted some of the key characters in the plot and changed the storyline, so it did not resemble the original movie at all. How would this make you feel? Would you feel like you need to tell the original story or just let everyone believe the false narrative?

Funny, thing is that for those supporters of the Polar Configuration; some of which are fanatical and display cult like behaviour, don't seem to know much about it. I is very likely that most of them have not even read Talbots, Thornhill or Velikovsky's books, much less gone to the sources cited to confirm what is being said and the concussions reached.

To some people it is OK to criticize or destroy Velikovsky's work (which most are not even familiar with),but it is not OK to question or discuss the Polar Configuration model because is popular belief? As if is not science but religion or politics.

It is a big problem that because TBP is the most popular proponent of the Electric Universe/ Plasma Astro-Physics because of their video series, that most of their followers, including the founders of TBP, reject 'new' or unfamiliar information that doesn't fit their PC model.

Some history of the Polar Configuration model:

From Jno Cook's Saturnian Cosmology: Chapter 3: The Osiris Mystery

<https://saturniancosmology.org/intro.php>

And

<https://www.everythingselectric.com/eu-theory-saturn-polar-configuration/>

"Thornhill proposed in 2001 that the Saturnian System, including the planets Earth and Mars (he does not believe that Venus was part of this group) first entered the Solar System in circa 3,200 BC and approached from below at an angle of 24 degrees to the ecliptic. After a relatively quiet period, during the "Era of the Gods," the three planets would join the other solar planets, although not until a number of violent interactions displaced Saturn, Mercury, and Mars to more distant locations (plus a relocation of the nearby Jupiter). Thornhill estimated that the corkscrewing action would have taken less than 300 years.'

'David Talbott initially sought to disprove Velikovsky's notion that Earth had at one time been a satellite of Saturn, but twenty years later he was solidly convinced otherwise, publishing The Saturn Myth in 1980.

In 1960 David Talbott started investigating the ancient literature of Mesopotamia and Egypt, and soon came to the conclusion that, in fact, Saturn had stood in the sky, ablaze like a sun, during an earlier period

recalled by people of the second and third millennium BC. The ending of the "Era of the Gods" (in 3147 BC). Talbott concluded that, before about 3,000 BC, Saturn had stood over the North Pole of Earth as an immense globe, connected to Earth with a stream of dust or water, with Mars in an intermediate position. Thornhill suggested an initiation of the signs in the sky in 3,200 BC, and a demise within a few hundred years."

Wal Thornhill in this video interview with Rex from 2019:

<https://youtu.be/cHzDmxOEKUU?t=3131>

at minute 52:11 The timing of the capture of Saturn's system with ORBITING planets is the same as the last ICE AGE or 12,000 years ago (when big changes in temperatures indicate that we were in an elliptical orbit for a SHORT time. PROBLEM: The calculations of the last Ice Age by mainstream are incorrect because they assume that the ice sheets have been intact and in the same place for 'millions' of years; not even 12,000 years old. And upon studying the scientific sources found in my work (including dendrochronology) and well as in Velikovsky's research, the ice sheets are no older than 8,000 years old, and have actually moved several times since then and as late as mid 500's BC.

QUESTIONS OR PROBLEMS I FOUND WITH THE MODEL

They don't include in their PC model or ever talk about the other planets in our solar system including: the Moon (Selene/Mene/Nannar-Sin Aphrodite), including 20 + planets and moons that partook in the war of the Titans that describes the formation of our current Solar System; which began with the dethronement of Ouranos, Poseidon/Neptune & Hades/Pluto by Saturn & Jupiter. Some of the planets & moons ignored are:

HEPHAESTUS, HELIOS, ZEUS, HADES, HERMES, POSEIDON, EURYALE, STHENO (gorgon sisters of Medusa that interacted with Earth and each other, at the same time that Medusa interacted with Earth (Gaia or Thetis) together with POSEIDON/NEPTUNE (who turned into a gorgon too at this time)) in events that took place during the sinking of Knossos/ Minoans (I have visited the palace of Knossos which got whipped out by the catastrophes including quakes, tsunamis & Santorini's eruption c.1,500 BC) and during the Trojan war (Troy has been found and is considered historic fact not fiction, btw) HADES, DEMETER, APOLLO, ARTEMIS, DIONYSUS, PHAETON, AMPHITITE, HERACLES, PERSEUS, just to name a few.

You can read about the events in the easy version here: <https://www.greek-mythology-pantheon.com/poseidon-neptune-greek-god-of-the-sea/> or you can read about each OLYMPIAN & TITAN GODS here: <https://www.theoi.com/greek-mythology/olympian-gods.html> & here: <https://www.theoi.com/greek-mythology/titans.html> & here: <https://www.theoi.com/>

They say that Velikovsky is a key foundation of their model and at the same time utterly dismiss his research which is supported by correlating detailed geologic, historic, scientific & mythological data. Data which is based on many chronologists who link the events of planetary catastrophes to living historic kings and cultures to form a unified timeline as well as changes to the lengths of Calendars throughout history? WHY ARE THERE NO CALENDARS BASED ON SATURN AND THE POLAR CONFIGURATION?

After acknowledging that CAPTURE of planets and stars by the solar system is the way that solar systems form (including the capture of Saturn & its satellites by our Sun), they completely dismiss the fact that rogue

planets or dwarf stars can still be captured by the solar system. Even mainstream acknowledges capture as part of formation of the solar system & that rogue planets are more abundant than orbiting planets (Article from 2019 where astronomers speak of a rogue Planet disturbing the orbit of Neptune & capture of planets by the Solar system).

They acknowledge that Venus was once a comet in the solar system, but dismiss that Mercury, Mars and many other satellites also behaved like comets since at least 5,000 BC, & until recent times and continue to pose a problem or threat to Earth. Dismissing Velikovsky's historic records about Mercury, Mars, the Moon, Jupiter, Neptune, behaving like comets, and also ignore Andy Hall's research on Comets affecting Earth, Sun & the Solar system.

They say in the model, contrary to the Mythologies that Venus/Athena was born from Saturn not a single source says that: Athena/ Venus was born from Saturn. And base their whole model on the wrong premises, disregarding the Moon/Aphrodite who was one of the eldest planets to be worshipped.

Not a single source says that Athena/Venus was birthed from Saturn: Athena/ Venus was born from [1.1] ZEUS & METIS (Hesiod Theogony 887, 924; Apollodorus 1.20) [1.2] Born from the head of ZEUS (Hesiod Theogony 887, 924; Apollodorus 1.20, others). They say that Velikovsky made it up. How can they pose as 'Mythology Experts' and not even know that Aphrodite (also known as Selene/Urania as the daughter of Uranus) is the MOON with a totally different genealogy and history. And don't 'know' that the original Greek Aphrodite was syncretized (made to be the same as) with the 'Roman VENUS' by Cicero as late as 60 BC in a

POLITICAL move to help Julius Caesar become the CAESAR of Rome (claiming direct descend from Venus through Aeneas, a prince of Troy who founded ROME in 8th century BC). THEREFORE VENUS/ MEDUSA/ ATHENA NEITHER ARES/MARS EXISTED IN ANY MYTHOLOGY AS THE OLDER PLANETS & AT THE TIME OF THEIR POLAR CONFIGURATION.

HELIOS is another case of syncretization with Saturn after 2,000 BC (But only by the Chaldeans late Babylonians, who were worshippers of Enki/ Saturn & Marduk/Jupiter) as Eve Chocrane stated and SCHOLARS OF MYTHOLOGY ARE NOT EVEN CERTAIN THAT SATURN WAS EVER A SUN OF EARTH, MUCH LESS EARTH'S ORIGINAL SUN! see below:
And they don't acknowledge the fact that Helios was equated with Apollo (current Sun circa 100 BC). And they don't know or acknowledge that Marduk & Enki SUPPLANTED Ninurta (Jupiter) & Elil (Saturn) were supplanted by the Chaldeans after 2,000 BC). Not to mention many other distortions to the mythologies that I cover in my books.

AND: Ev Cochrane in Gaia's Electric Universe S01E03 at minute 20:56 said the scholars have UNCERTAINTY about Saturn having been the original Sun or even being called 'the Sun', due to the fact that most world mythologies didn't refer to Saturn as the original Sun. Ev Cochrane gives the example of the Maya and Aztec mythology not mentioning Saturn as a Sun but fails to mention that the Maya and Aztec DO have the legend of the FIVE SUNS; where their ancestors experienced FOUR different Suns before our Present Sun.

6. What is the evidence that Venus was/is a water planet or that it was born from Saturn? There were many floods in the past not just one, as most

likely all the gas giants flared/nova LIKE Saturn did when it was captured, and that is why they all have rings. Most planets have changed their axis.

They state that comets are only small pieces of carved material from Mars while the ancient historians and Cometographers state that Comets can be as big as the Moon or Venus & cause natural disasters, even to this day.

They dismiss that the gods were real human rulers as well as representing planets as told by historians throughout time; and why do they dismiss all historical events described in Mythologies and Sacred Texts, like the Trojan War and destruction of the Minoans when they have been unearthed and proven as historical fact, and instead they state mythology is all 'fantasy' and came up with the 'Archetype' meme, syncretizing different historic rulers of different eras to be one and the same.

They make all the different catastrophes to have taken place in ONE SINGLE event circa 11,000 years ago, contrary to all the mythologies and historic records of catastrophes. And say that every single darn petroglyph and pictograph and symbol is the polar configuration:

Squatter-man is not the polar configuration, it was a plasma formation seen at the poles probably due to a high current entering the Earth, or perhaps caused by comets that interacted with Earth's Birkeland currents, discharging planets or the observation of the axis of the Pleiades' (known as the local chimney or Z -pinch), as Jim Weninger proposes. Also, Earth was behaving like a comet for thousands of years and the Axis of Earth and the other Planets & Gas Gants tilted several times according to the ancient records, during the capture process, possibly due to either

electromagnetic SHOCKWAVES of Proto Uranus, Saturn, Neptune, Jupiter going nova & or due to interaction with the other Planets as mentioned in the war of the titans & historic records?

The 'Cosmic Mountain' is not the polar configuration, it is a symbol used for Venus and Tanit, and many other comets as seen from the earth: the tails of the comet form a mountain or pyramid and the head of the comet sits at the top, sometimes seen as a circle with or without rays, as seen in the Great comet of 1066 AD. (see my video and read Tanit-Venus, or the many photos of comets.

The Solar Disk, Sun Disk or Sun wheel, or Crosses inside Orbs, Crosses and Swastikas; Concentric circles, etc, are Not the polar configuration, they are plasma shapes seen in comets and their many tails, sometimes one, 2 5,7 tails seen throughout history until couple centuries ago.

After acknowledging that small comets have an electric effect on the Sun, dismiss that they also have an electrical effect when they connect with any of the planets in the solar system, the Earth and the Sun, including electric discharges, and why did they create the Polar configuration model during the capture of Saturn and all the other planets by the Sun's heliosphere but dismiss the behaviour of Comets with companions that orbit the larger body and don't follow in a straight line like Biela, Hale-Bopp, (unlike Thornhill's model of brown dwarf w/planets behaving as comet.) They seem to use a heliocentric solar system model instead of a helical/ Vortex model, which explains very well the order of planetary catastrophes describes in Sumerian/Hurrian, Greek, Orphic & Roman mythologies.

I found is that most of the sources used in Talbot's book 'The Saturn Myth' are Second Hand accounts of books written in the 20th century about

mythology that lack sources like Jastrow, & Talbott takes out of historic context many characters, quotes & references, i.e. 'To the one we call Saturn they give a special name, Sun- Star' and quotes Diodorus II. 30-33; but fails to include Diodorus full quote when he speaks of Chaldean astronomers (c.1,000 BC): "But above all in importance, they say, is the study of the influence of the five stars known as planets, which they call "Interpreters"⁵⁷ when speaking of them as a group, but if referring to them singly, the one named Cronus⁵⁸ by the Greeks, which is the most conspicuous and presages more events and such as are of greater importance than the others, p451 they call the star of Helius, whereas the other four they designate as the stars of Ares (Mars), Aphrodite (Moon), Hermes (Mercury), and Zeus (Jupiter)⁵⁹ as do our astrologers." http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/2A*.html

The Chaldean don't say Cronus was ever Earth's sun or that Earth orbited Cronus/Saturn.

And when speaking of Osiris, he disregards that among classical writers like Herodotus, Diodorus, Plutarch, Plato & all cultures considered their 'gods' as of having both human rulers with a Planetary counterpart: 'the idea prevailed that Osiris lived on our earth as a man or man-god. Egyptian sources, too, often portray him in human form.' But then goes on to dismiss in his video series all mythological characters & places as FICTION, including Atlantis, Troy, Mount Olympus, etc....

He disregards Diodorus saying that Osiris was the son of Kronos, and that before Osiris, the first human gods to rule were Hephaestus, who transformed into the STAR HELIOS; then Kronos ruled followed by his son Osiris (who was called SIRIUS to the Greeks or Dionysus). And that Osiris ruled together with Isis who was a human ruler represented by the MOON (and the Moon was considered one of the MOST ANCIENT of the planets).

http://penelope.uchicago.edu/Thayer/E/Roman/Texts/Diodorus_Siculus/1A*.html

There are different versions of the Polar Configuration, but I have not found anything in the mythologies that gives any clues to that. So it must have been an imagined theory, with no historic background.

Walter Thornhill says the planets had different orbits around Saturn till Saturn was captured by the Solar System. But Cardona thinks the Saturn System had that arrangement long before it encountered the Solar System.

Thornhill 2019 article: <https://www.thunderbolts.info/wp/2019/08/14/dwarf-planets/>

****One last thing that came up to my attention, regarding Gunnar Heinson's revision of Velikovsky's 'revised' chronology, that might be used by TBP. Couple of Heinson's contentions are the layers were archeological objects are found in Mesopotamia were out of order, but this can be explained taking into account the multiple violent catastrophes that Earth and cities have suffered in the past. The second is that Berossus never mentions ancient Sumer, therefore we must delete and ignore all previous Kings, rulers and records by Cometographers & historians that recorded the different catastrophes linked to that era. Berossus or Berosus was a Hellenistic-era Babylonian writer, a high priest (& descendant) of **Bel Marduk** and astronomer who wrote in the Koine Greek language, and who was active at the beginning of the 3rd century BC.

To understand why this happened you can find the answer in most of my books, specially in Mythos & Cosmogony that deals with Genealogies of

the gods. I will explain in syntheses: Marduk's rule began during king Hammurabi who wrote the Code or Laws of Hammurabi (Babylonian laws) under Marduk's command. Marduk was the son of ENKI/EA. Enki /Ea was the Elder Half-brother of ELIL/ENLIL. Marduk was the cousin of Ninurta, Elil's first born son. Elil was Marduk's uncle. Ea and Elil were born to different women: Elil was born to Anu's Half Sister and wife known as ANTU (GAEA- GAIA.)

Ea/Enki was Anu's first born with consort Ninmul. Enlil's wife was NINHURSAG/Nammu/Ninmah, known as Tiamat-Chaos in Marduk's Enuma Elish.

The Babylonian story says that the Anuna arrived in Eridu (Paradise or Garden of Eden) 120 saroi before the Deluge or about 1,200 years: **Saroi** (translated as "shars") is singular for saros. One Saroi/shar is half a saros. Measured by Suidas' standard, viz. 1 **saros** = 222 lunar months OR **18.5 years**. https://calendars.wikia.org/wiki/Saros_cycle

Because according to their customs the first born son, born to a half-sister of Anu had priority to the throne, Elil and his son Ninurta became Chief rulers of Earth because of their mother. This made Ea and Marduk very angry as Ea, although being the eldest did not have priority to Kingship. During pre Deluge and post Deluge -the era of the 'BULL' constellation Taurus- (founding of Mesopotamia and Nippur) Elil and Ninurta were the chief rulers, until about the year 2,000 BC or the time of Abraham & Gilgamesh (Sir Leonard Wooly proved that Gilgamesh & his sister queen Nin-Puabi were historic fact when he excavated Ur and found the royal tombs & inscriptions of Gilgamesh in buildings., when Jupiter & other satellites interacted electrically with Earth & sent flares (Thor's hammer & Zeus' thunderbolts) causing immense destruction, including the

'Overturning of the Plains', where many ancient cities were lost, either swallowed up by chasms, beings turned upside down, conflagrations, land slides, floods, tsunamis, volcanic eruptions (i.e. the destruction of Sodom & Gomorra happen by 'brimstone & fire') and the thunderbolts most likely created the Dead Sea rift and instantly petrified people (into 'pillars of salt').

Due these catastrophes, the era of the 'RAM' or constellation of Aries was seen & entered and Marduk was able to take control and became the Dictator or sole ruler, thus 'Marduk has 50 names' (absorbing the ranks of the other gods/rulers). SO he had his minions write up a new version of the 'History of Creation' and called it Enuma Elish. In this new version Elil and Ninurta and Nibiru, supplanted the names of Ninurta & Jupiter who had become the ruling planet for Marduk; Elil/Saturn was supplanted by Ea/Enki and Tiamat supplanted NIBIRU, making Elil's wife the 'Monstrous 7 headed serpent (or comet) that Marduk vanquished & 'split', creating the Euphrates and Tigris rivers and other terraforming events.

Therefore like many contending tribes, like the Eagle/Bulls/Lions vs the Dragon/Goats/Fish for example, throughout history & seen with The German 'Holy Roman Empire & Tartary to give juts one example. Contending tribes attempt to erase their enemies by erasing past historic characters from historic records and genealogies, including those found in Mythologies, due to resentment & greed for power & control.

Regarding Heinson's contention that Manetho & Berossus kings lists were 'falsified': As I explain in pg 99 of Mythos & Cosmogony, the LENGHT of there term 'SARO' was MISINTERPRETED by Halley in 1691 & even though Guillaume Le Gentil in 1756 pointed out the erroneous interpretation, historians did not correct the misinterpretation. Therefore all the Historical

texts written by Berosus have been wrongly calculated, including his Kings' List. For 120 saroi make 222 years (years of 12 lunar months) according to the Chaldeans' reckoning, **if indeed the saros makes 222 lunar months, that equals to 18 years** -of 12 lunar months- and 6 months. One SAR equals 9 years (NOT 3600 YEARS).* full explanation below.

The same wrong interpretation occurred with the term 'YEARS' used by the ancients. As a YEAR meant a MONTH, as pointed out by Manetho HIMSELF, Sir Isaac Newton and current Egyptian calendar scholars. And the same erroneous interpretation occurred with Platos '9,000' YEARS since the sinking of Atlantis, which should make it about 1200 years before his time.

If we removed or deleted the cultures previously to the Chaldeans (c. 1000 BC), like Heinson did we would be erasing from history over THREE THOUSAND years of historic and catastrophic events linked to specific rulers: Elil, Ninurta, Anu, Inanna, Dumuzi, etc: Elil/Saturn's nova & Deluges of c. 5-4000 BC; Mercury's approach c. 3,800 BC & destruction of Babel (Ninurta/Jupiter), Kings from Ur: like Gilgamesh & Isaac, & Abraham, during the Jupiter interactions of c. 2,100 BC, destruction of Sodom & Gomorra, Heracles... We also need to understand that 'labels an names' given by historians to past cultures are NOT the names that those cultures called themselves.

I find it truly alarming that Heinson would not be familiar with the cuneiform clay tables that speak of these kings & events; kings that ruled before Marduk & before Chaldea even existed or Berossus. Either Heinson was incompetent or he was bias, trying to purposely erase the enemy lineage & tribes of the Enki/Marduk (part of the Dragon Bloodlines). And this is perfect example of how we can not blindly 'believe' ANYBODY'S

conclusions and affirmations, without further research and critical thinking; when conclusions are based on re-written history which has been purposely or erroneously misinterpreted.

Another BIG problem I have found with many 'theories' is that if we disregard as fantasy the fact that rulers called 'Lords' and 'gods' were real HUMANS who fought endlessly with their enemy tribes and re-wrote history over and over, and linked to this, is the fact that if we can't understand that World's Mythologies and Sacred texts like the Puranas, Old Testament, Enoch, (which are based in Sumerian texts like the Atrahasis & Enuma Elish) are the GENEALOGICAL RECORDS of these Lords & gods, then we won't be able to come to the correct premises on which we base out theories and models.

After all the research, critical thinking and my analysis of scientific geologic evidence, Genealogies, world Mythologies, Sacred Books, Ancient writings, Ancient chronologists & historians that I have come across in over 7 years, I could never ignore the information I have learned that allows me to get the BIG PICTURE; of both the History of the Solar System & Humans; and support a model that has no legs to stand on, and if you read my books you will see that I have based them on sources that have detailed historic information and can be correlated with other historical claims & events. Their PC theory is based on assumptions, conjectures & misinterpretations of material taken out of historic context. Stating that ALL the symbols carved in stone portray only Saturn's polar configuration is completely absurd. As they relate to thousands of comets, planets and plasma formations seen in the skies for the at last 7,500 years according to ancient texts & scientific data. In my opinion The Electric Universe does not need the Polar Configuration model.

All my books and videos have the sources that support my views and bring out these questions & critique, so please check them out if you are curious and want to find out more.

("The Sumerian word "šár" was one of the ancient Mesopotamian units of measurement and as a number based on a Month & Lunar cycles. The term "sāru" was later used by the Chaldean (Neo-Babylonian) astronomers circa 1000 BC. It was later known to Hipparchus, Pliny the Elder, Ptolemy, but under different names. The Greek word "sa·ros" (σάρος) ('saros' is singular and 'saroi' is plural. A sar is one half of a saros.) The greek term saros was first given to the eclipse cycle by Edmond Halley in 1691, who took it from the Suda, a Byzantine lexicon of the 11th century. The information in the Suda was derived directly or otherwise from the Chronicle of Eusebius of Caesarea, which quoted Berossus. Guillaume Le Gentil in 1756 realized the misinterpretation and claimed that Halley's usage or the term saros was incorrect, but the name continues to be erroneously used. Therefore all the Historical texts written by Berossus have been wrongly calculated, including his Kings' List. For 120 saroi make 222 years (years of 12 lunar months) according to the Chaldeans' reckoning, **if indeed the saros makes 222 lunar months, that equals to 18 years** -of 12 lunar months- and 6 months. One SAR equals 9 years (NOT 3600 YEARS).)

King Arthur and the Dark Ages. eBook sources by Tess Clark <https://mythosdecoded.wixsite.com/mythos>

Jim Weninger's 'Electric Course of the Heavens'

<https://youtu.be/3IUJDFS-cLA>

The Julii Caesares traced their lineage back to the goddess Venus, but the family was not snobbish or conservative-minded.

<https://www.britannica.com/biography/Julius-Caesar-Roman-ruler>

Venus, ancient Italian goddess associated with cultivated fields and gardens and later identified by the Romans with the Greek goddess of love, Aphrodite. Venus had no worship in Rome in early times, as the scholar Marcus Terentius Varro (116–27 bce) shows, attesting that he could find no mention of her name in old records. <https://www.britannica.com/topic/Venus-goddess>

APHRODITE, MOON, SELENE, URANIA.

According to the version of her birth recounted by Hesiod in his Theogony, [86][87] Cronus severed Uranus' genitals and threw them behind him into the sea.[87][88][89] The foam from his genitals gave rise to Aphrodite[4] (hence her name, which Hesiod interprets as "foam-arisen")...

Aphrodite is the MOON/Selene/Urania, not Venus. (Aphrodite was Syncretized latter on by the Romans with Venus). PARENTS of Aphrodite:

[1] Born from the castrated genitals of OURANOS in the sea's foam (Hesiod Theogony 188, Cicero De Natura Deorum 3.21, Apuleius 6.6, Nonnus Dionysiaca 1.86, et al) [2] ZEUS & DIONE (Homer Iliad 5.370; Euripides Helen 1098; Apollodorus 1.13, Cicero De Natura Deorum 3.21, et al) [3] OURANOS & HEMERA (Cicero De Natura Deorum 3.21)

<https://www.theoi.com/Olympios/Aphrodite.html>

<https://selenemoongoddess.fandom.com/wiki/Aphrodite>

If 'castration & swallowing the children' is code for CAPTURE of planets from Saturn by Jupiter; and Cronus castrated & swallowed the planets from Uranus exactly like Cronus did to Uranus, that means that Uranus had planets and moons, including our Moon that was born from Uranus genitals (planets).

Aphrodite or the Moon was the daughter of URANUS not Saturn, therefore she would have been a satellite of Uranus. 'The Roman goddess Venus, with whom Aphrodite was extensively SYNCRETIZED (to make 2 different people or subjects into ONE and the same) by the Roman politician Cicero c. 60 BC during Julius Caesar's reign which ended in 44 BC (Venus approach). Cicero said Aphrodite was Venus as a political maneuver to help Julius Caesar become Caesar; if he could prove his 'claim of royal descent from Venus' through Aeneas, prince from Troy who founded Rome in 8 century BC. Ishtar is Inanna, the daughter of Ninurta, and grand daughter of Elil/ Enlil (Saturn).

From Thornhill:

"So what I'm suggesting is... that all of the planets and moons in the solar system did not originate with the Sun; they were captured. Capture of a

brown dwarf star begins when the plasma sheaths touch and they “see” each other electrically for the first time. The brown dwarf changes from being an anode in a galactic discharge to a cathode in the Sun’s environment. The adjustment is drastic. The brown dwarf is no longer a star. It becomes the mother of all comets and subject to a steady electrical acceleration toward the Sun. That acceleration will tend to cause the satellites of the brown dwarf to be dislodged from their orbits and, in a dynamic equilibrium, strung out behind in their primary’s cometary wake. [Cardona thinks the Saturn System had that arrangement long before it encountered the Solar System.]...”So Walter Thornhill says the planets were orbiting Saturn till then. nSince a comet’s ion tail is a discharge current, the satellites will experience “mega auroras” and devastating interplanetary discharges to varying degrees.. In an Electric Universe, a star’s photosphere is, in reality, a “glow discharge”, whose spectrum indicates its elemental composition. Therefore, a star’s diameter is not dependent on a solid body measurement: its photospheric “surface” exists well above any “real” exterior veneer. Surrounding the Sun (and other stars, presumably) is a plasma sheath that forms a boundary between the electrical condition of the Sun and the electrical environment of the Milky Way. This sheath is known as a double layer, forming the heliosphere that protects the Solar System from the oppositely charged Interstellar Medium. One major characteristic of double layers is that they oscillate. “Magnetic fields of stars are defined by the sun’s passing along large filament currents flowing along & defining the arms of the galaxies.”
